**RE: WT 11-65: *In the Matter of applications of AT&T Inc. and Deutsche Telekom AG for consent to assign or Transfer Control of licenses and Authorizations***

Dear Chairman Genachowski and Commissioners:

Like many others who have written you letters in the past month, I would like to voice my support for the application of two companies to join forces: T-Mobile and AT&T. As a consumer and a businessman, I have a strong interest in the advancement of communications technology. My children have grown up in a generation where being technologically savvy is essential and have imparted this belief to me. At ages 23 and 21, they have both watched the Internet transform from dial-up access to today's fast wireless networks. The future holds opportunities for further advancement, specifically the extension of wireless broadband to hundreds of millions of Americans.

In my workplace at Caledonian Financial, we use online and mobile services regularly to manage our clients' retirement and financial planning goals. American consumers, both individuals and businesses alike, need expanded wireless broadband capabilities, and the demand exceeds what a single telecommunications company might be able to do on its own in a short period of time.

I urge you to approve this merger and encourage the more widespread availability of these important telecommunications services.

Sincerely,

Montee Sneed, CFO  
Caledonian Financial
